Taller NoSQL: MongoDB Compass + MNIST

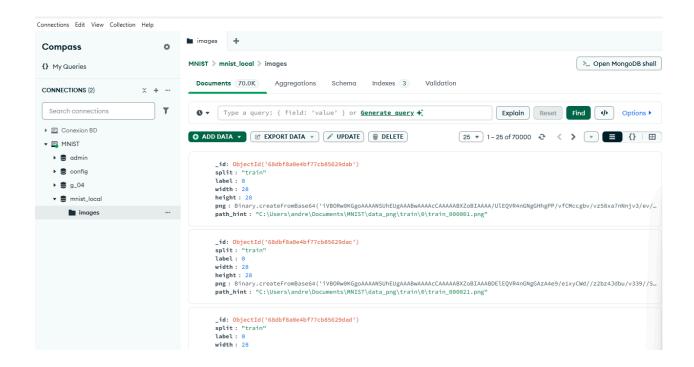

Bryan Stiven Gomez Taborda

conversión a PNG e inserción a Compass desde Júpiter Notebook de Colección MNIST y Colección Images:

```
[15]: # Requiere que antes ya hayas definido: DATA_DIR, discover_mnist(), ensure_pngs()
        if 'ensure_pngs' not in globals():
            raise NameError("Falta definir ensure_pngs(...). Ejecuta antes la celda donde se declara la función.")
        if 'paths' not in globals():
            if 'discover_mnist' not in globals():
            raise NameError("Falta discover_mnist(...). Ejecuta antes su celda.")
paths = discover_mnist(DATA_DIR) # construye paths si aún no existe
        PNG_ROOT = ensure_pngs(paths)
       print("PNG_ROOT:", str(PNG_ROOT))
        No se hallaron NPZ/IDX/PNG. Descargando MNIST (keras.datasets)...
       Guardando train: 0%|

Visualización Rápida en NoteBook:

Modelo keras y Entrenamiento:

```
model.save("models/mnist_model.keras")

# (opcional) formato HDF5 legado (.h5) - mostrard un WARNING, pero funciona
model.save("models/mnist_model.h5")

# Para exportar a SavedModel (carpeta) para TF Serving / TFLite:
model.export("models/mnist_savedmodel") # <-- ESTA es La AFI correcta en Keras 3

WARNING:absl:You are saving your model as an HDF5 file via 'model.save()' or 'keras.saving.save_model(model)'. This file format is considered legacy. W
e recommend using instead the native Keras format, e.g. 'model.save('my_model.keras')' or 'keras.saving.save_model(model, 'my_model.keras')'.
Saved artifact at 'models/mnist_savedmodel'. The following endpoints are available:

* Endpoint 'serve'
args_0 (POSITIONAL_ONLY): TensorSpec(shape=(None, 28, 28, 1), dtype=tf.float32, name='keras_tensor')
Output Type:
TensorSpec(shape=(None, 10), dtype=tf.float32, name=None)
Captures:
1795916101584: TensorSpec(shape=(), dtype=tf.resource, name=None)
1795916202128: TensorSpec(shape=(), dtype=tf.resource, name=None)
1795916080488: TensorSpec(shape=(), dtype=tf.resource, name=None)
1795916101776: TensorSpec(shape=(), dtype=tf.resource, name=None)
1795917346128: TensorSpec(shape=(), dtype=tf.resource, name=None)
1795917346128: TensorSpec(shape=(), dtype=tf.resource, name=None)
1795917346128: TensorSpec(shape=(), dtype=tf.resource, name=None)
1795717346128: TensorSpec(shape=(), dtype=tf.resource, name=None)
```

Funcionamiento:
